

10 Questions to Ask Your Oral Surgeon at Your Consultation

1. What is your experience and qualifications specifically with dental implant procedures?
2. Based on my oral health assessment, what tooth replacement options do you recommend and why?
3. Will I need any preparatory procedures like bone grafting before getting dental implants, and what would that involve?
4. What type of anesthesia or sedation options do you offer, and which would be best for my situation?
5. What is the estimated total cost of my treatment plan, including all necessary procedures and follow-up care?
6. Does your office offer any financing options, cash discounts, or assistance with insurance coverage?
7. What materials do you use for implants and restorations, and what are the benefits of those materials?
8. How long is the typical recovery period, and what kind of post-surgical care will I need?
9. How will you coordinate care with my general dentist, especially for the final restoration?
10. What is the warranty on implants placed in your office?
